Overview

Network carried out various projects for the Hospitals Chef Engineer Mr John Tiernan over many years which included Fire upgrade work to Building's A-B & C Upgrading café - renovating toilets to wards-Installation of fencing adjacent to Linen store-Resident cottage upgrades – demolition of old X Ray ward –Replacement & installation of non slip flooring, etc.

Minimising Disruption

As the projects was taking place within a live environment, the client needed Network to ensure minimal disruption to its operations and staff and patients.. There was continuous consultation with the chief engineer & the DON in regard to noisy activities taking place and also demolition works were conducted to minimise inconvenience to patients and staff.

Complex Elements

As it was a working hospital – Network had to ensure minimal disruption to day to day operations of hospital.
